Folding Sliding Doors

Bi-folding doors are the latest, stylish alternative to french doors or patio doors. They can be fitted to conservatories, patios, roof gardens, balconies or even extensions.

The 2 to 7 pane system allows for greater versatility and a wider opening area than either patio or french doors, increasing natural light and ventilation.

When fully closed the doors benefit from all-round multipoint locking and sealing, protecting from both the elements and any would-be intruders.

Operation is simplicity itself with one master leaf and a combination of slave leaves, all travelling smoothly on 4-wheeled runners.

It's when opened fully that the real benefits of the doors can be appreciated. The doors "concertina" back on themselves providing a real sense of bringing the outdoors indoors - perfect for relaxing on lazy summer days or balmy summer nights!

Opening Options

No.	Scheme No.	Description
