Eurosafe Safety Catch

The Eurosafe security system can be installed on existing doors and windows manufactured from either timber or PVCU.

- Provides additional protection against the levering open of the door or window from the outside
- Consists of solid frame and sash blocks, locked through a security steel pin
- Concealed screws on the frame and in the sash over-rebate
- Operation is simple and reliable. The window or door can be opened when the security pin has been released
- Available in white or brown finish to complement both white and woodgrain profiles
- Security version also available with a grub screw
