Letterplates

Choosing Your Letterplate

IDENTIFICATION

1. Letterplate Size:

There are two standard letterplate widths and options of standard or slimline heights - all designed to accept A4 sized post:
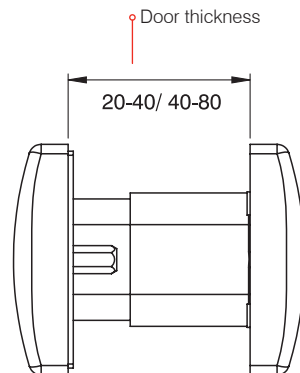

> 10" standard
>
> 12" standard
>
> 12" slimline

2. Application:

The thickness of the door will vary depending on the material that it is manufactured from - PVC, composite, timber, aluminium or hybrid.

Mila offers two telescopic sleeve sizes:

> 20/40 – suitable for door thicknesses from 20-40mm. This size is typically used for PVC door panels

> 40/80 – suitable for door thicknesses from 40-80mm. This size is typically used for PVC mid-rails and for composite or timber doors

Door thickness

20-40/ 40-80

3. Select the Finish Required:

Mila stocks a comprehensive range of letterplate colours:

Polished Gold	Polished Chrome	Smokey Chrome	Smooth Satin Chrome	White	Black
Anodised Silver F1	Anodised Gold F3	Brushed Stainless	Polished Stainless	Polished Gold Stainless

ProStyle Letterplate

PRODUCT INFORMATION

Mila's high-quality ProStyle letterplate combines elegant, contemporary styling with reliable operation, weather-sealing and it has a reassuringly weightly feel.

- Colour-matched frame and flap, manufactured from zinc
- Concealed flap operating mechanism - patented design
- Internal and external thumb access for ease of use
- Both external and internal flaps open to 180° when fully open without over stressing
- Smart frame design prevents abrasive action against the flap during operation
- Independently tested to 50,000 cycles for operational reliability
- Independently salt spray tested to 240 hours (plated) 480 hours (powder coated) for corrosion resistance
- Available in 6 suited finishes
- Suites perfectly with Mila's ProLinea and ProStyle door furniture ranges
- Designed in-house

SupaStyle™ Fire Rated

Stainless Steel Letterplate

30 minute fire-rated **60** minute fire-rated

PRODUCT INFORMATION

Mila's SupaStyle™ Stainless fire-rated letterplate is both FD 30 and FD60 compliant for up to 60 minutes resistance to fire.

- Supa™ stainless steel coloured flap with matt black powder coated frame
- Manufactured with stainless steel grade 304 flap and zinc alloy frame
- An intumescent liner provides in excess of 60 minutes fire resistence
- Concealed flap operating mechanism - patented design
- Internal and external thumb access for ease of use
- Both external and internal flaps open to 180° when fully open without over stressing
- Smart frame design prevents abrasive action against the flap during operation
- Suitable for door thicknesses 40mm - 80mm

- Tested to BS 476: Pt 20 & 22: 1987
- Independently fire tested at Trada to FD60, achieving a 60 minute rating
- Independently tested to 50,000 cycles for operational reliability
- Independently salt spray tested to 1000 hours for corrosion resistance
- Available in 3 colours which suite perfectly with Mila's Supa™ stainless steel door furniture range

CAUTION Letterplate MUST be fitted with intumescent liner provided and positioned in door as per fitting instructions also provided to comply with fire regulations
