

ProSecure **MAXIMUM SECURITY** Cylinders

- 3 Star Security • Sold Secure Diamond Standard •
- Snap Secure Technology • TS007 Compliant •
- Restricted Profile Dimple Keys •

Hardware that starts with you.

ProSecure **Maximum Security** Cylinders Sold Secure Diamond Grade

The ProSecure cylinder range are the most secure cylinders on the market, designed to withstand all common methods of attack.

The cylinders are manufactured from a combination of brass and hardened carbon steel and combine intelligent security features to provide maximum security:

Patented snap secure technology

Unique sacrificial point resists entry via cylinder snapping

High strength carbon steel block prevents unplugging and protects the cam

Steel anti-drill pins

Anti-pick pins

Anti-bump pins and anti-bump steel frame combination

Restricted profile dimple keys and double row of active pins provides 180,000 effective differs

Key copy protection only the registered warranty card holder can order duplicate keys

The unique sacrificial point, if attacked externally sets an interlocking cam mechanism into action, preventing any further damage to the internal parts of the cylinder, The lock remains operable from the inside for the home owner, allowing them to operate the door and exit the property.

Horizontal Keyway

Security pins, snap secure technology, unique sacrificial point and cam protection block

Thumbturn option available

Restricted profile dimple keys and key copy protection

Closed Profile Technology
with dimple key security

Unique Sacrificial Point
for snap secure protection

High Strength Carbon Steel Block
resists snapping, unplugging and protects the cam from manipulation

Unique Registration Code
for key copy control

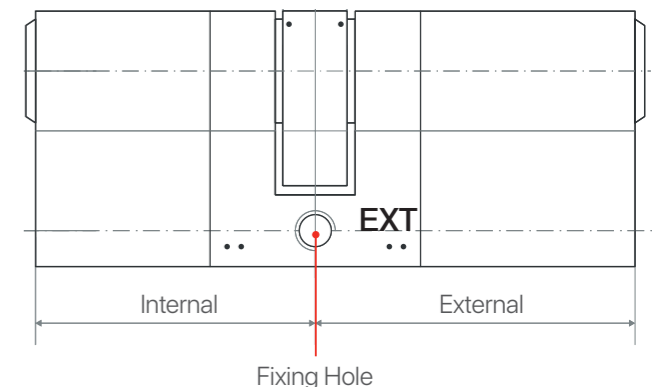

- Tested to EN1303:2015, TS007: 2014 and A1: 2015 for cylinder enhanced security
- Available in brushed brass and brushed nickle
- Available in double, thumbturn and keyed alike
- Contact our sales team for our in-house keying alike and pairing alike service

Hardware that starts with you.

Part Numbers | It is crucial to know the internal and external cylinder measurements when ordering.

- In the part numbers below, cylinders are prefixed with AP. The INTERNAL measurement is always shown first, followed by the EXTERNAL measurement, then the FINISH, then the VARIANT. For example: a 35/45 cylinder in brushed brass with a thumbturn is AP3545BRTT
